- ✓ **Monitor employee browsing activity and bandwidth usage**
- ✓ **Capture URLs and the length of visits**
- ✓ **Generate web usage reports/charts**
- ✓ **Block offensive sites and unapproved downloads (video, exe etc.)**
- ✓ **Allow authorised sites**
- ✓ **Restrict disruptive software (chats, games)**

CurrentWare Internet Management Suite is a web monitoring and restriction tool tracking user browser activity and preventing inappropriate browsing.

The Suite incorporates BrowseControl and BrowseReporter and helps both enforce internet usage policies and identify unproductive employees/students.

✓ **Monitor Internet Usage and Bandwidth**

Track and report web browsing activity by user or computer basis with comprehensive reporting in both tabular and graphical formats. Monitor Internet traffic on your network isolating users that are congesting it.

✓ **Automated Email Reports**

With BrowseReporter eliminate the manual task of generating reports! Schedule reports to be generated and emailed to you on a scheduled basis.

✓ **Remote Screen Capturing**

Monitor your users' computer activity by capturing screenshots of their computers.

✓ **Identify and Block Immediately**

Offensive and unauthorized sites can be immediately blocked, denied and exported to the blocked/allowed list on BrowseControl.

✓ **Enable/Disable Internet Access**

Completely block or allow Internet access to individual or group PCs/users.

✓ **Allow/Deny Access to URLs**

Enable browsing to selected sites only, lock out the rest.

✓ **Scheduler**

Schedule unrestricted browsing at specific times (e.g. lunch time). Or allow/block access to specific URLs at allotted times.

✓ **Multiple Consoles**

Give managers/teachers their own separate consoles to manage specific user groups based on location/department/branch etc.

✓ **Application Blocking**

Prevent users from activating unauthorised software: games, chats and media players.

✓ **Offsite Internet Control**

Allow/block lists and application blocker settings can be configured to offsite laptops.

✓ **User or Computer based policies**

Internet restriction policies can be configured by user or by workstation.

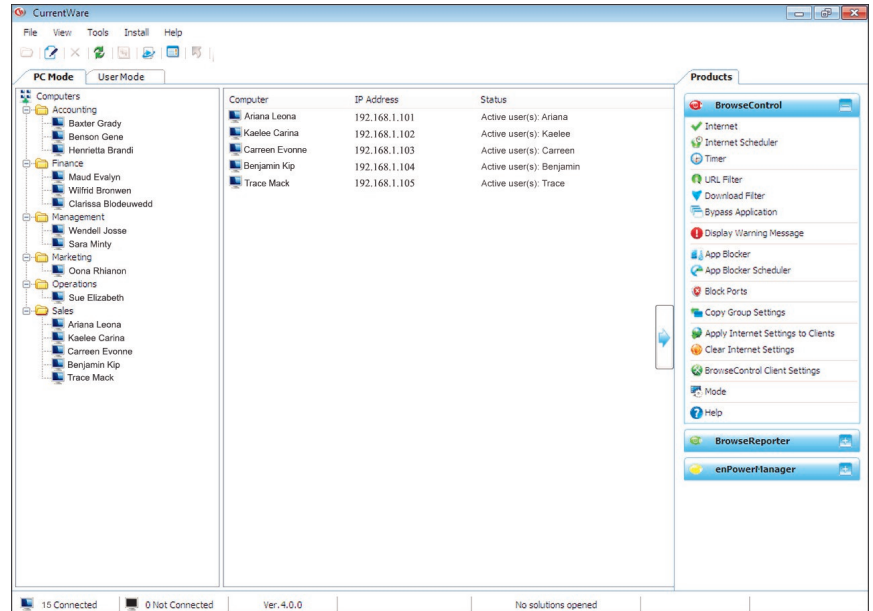

What's New

BrowseReporter and BrowseControl Integrated

Now available on an even more powerful and robust common console. The CurrentWare Internet Management Suite combines Internet filtering and monitoring policies of both BrowseControl and BrowseReporter which can efficiently be administered through this common interface. The clients for BrowseControl and BrowseReporter have also been combined offering improved deployment through Active Directory, 3rd party deployment tools or through remote installation from the Suite.

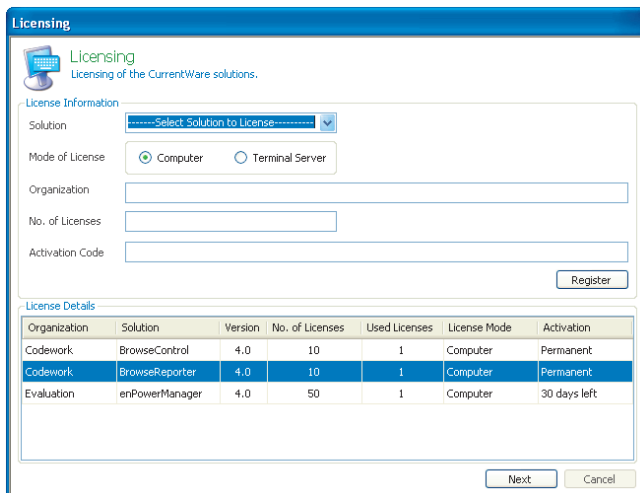

Terminal Server Compatibility

The CurrentWare Internet Management Suite now supports a Terminal Server environment and enables administration of internet access or web monitoring of thin clients.

"Your software is operating flawlessly on our network & it has ultimately increased the productivity of my staff here. They are more focused on their work tasks, so that is fantastic from my perspective."

Prestige Bricks & Pavers Pty Ltd
