

JAMEX

Codework Limited

MULTI-COPY VENDING SYSTEMS

The Ultimate in Flexibility for any Vending Application!

Interfaces for both digital and analog
copiers and print vending applications

Change Checker™ checks coin payout tube inventory before accepting bills and returns those larger than available change

Price per copy adjustable in .05 increments up to 99.95

Full refund of escrow, or optionally, one copy minimum **required before change is made**

Over 34.00 in self replenishing change storage

Bypass key switch for staff or service

Reliability

Full feature display for cash and bypass copies, with perpetual change tube inventory

Electronic coin validation for increased rejections of slugs and foreign coins

Sturdy steel housing

Flexibility

Available with optional stored-value card reader or internal receipt printer providing the patron with a receipt and a reconciliation report for the owner

A CS-1 support provides security for the front cassettes, a work area for the patron and a small footprint for the location (not shown)

The Base provides a free standing support for the vending system. This is shipped attached to the vending system to facilitate installation (shown in illustration)

Support

Two-Year Warranty

All cable, hardware, service manual, installation instructions, and signage included
